

Ignacio Amat

Barcelona, Spain · github.com/ignaaaam · ignacioamat@gmail.com

Passionate web developer with 4 years of experience. Enthusiastic about joining a company working on competitive projects. My goal is to help design and develop the best we can, while also solving any problems that arise along the way. As a FullStack developer, I have worked with different technologies and languages to improve my design and programming skills.

PROFESSIONAL EXPERIENCE

Manifiesto

Barcelona, Spain
2023 - Present

Full Stack Web Developer

- Developed FullStack websites as a developer for high-level companies including Banco Santander, Telefónica, Vueling, Repsol, Acciona, Sofima, ElPozo, Bimbo, TacoBell, Gimos, Citroën, and more.
- Built websites using HTML, Laravel, NextJS, Vue, Livewire, MySQL, and TailwindCSS, managing all these projects using GIT, Laravel Forge, and DigitalOcean.

Vilax (Internship)

Barcelona, Spain
2021 - 2022

Full Stack Web Developer

- Managed over 100 company and product websites primarily using WordPress & Elementor.
- Developed email marketing tasks and configured plugins to interact with WordPress and WooCommerce files.
- Installed and configured new WordPress sites, SSL configurations, and fixed all types of issues related to these technologies.

Freelance

Barcelona, Spain
2019 - 2021

Full Stack Web Developer

- Resolved tasks for individuals and private companies. These tasks involved using technologies like Laravel, creating websites, fixing implementations, and adding new sites, designs, sections, and rewriting code that could be improved.

FEATURED PROJECTS

Data Analysis Platform

Developed a data analysis platform that cross-referenced information from all social networks with a large amount of data, displaying analysis and graphs from all the data collected from each social network and also classified by accounts from those social networks. Includes user analysis, KPI analysis, interactive charts, and dashboards. Tech stack: Vue, Inertia, Laravel, TailwindCSS.

Points and Rewards System

Created a comprehensive points system where users can earn points for performance against objectives and redeem inventory. Enhanced functionality for data reporting and inventory analysis. Tech stack: Vue, Inertia, Laravel, TailwindCSS.

Automated Content Generator

Developed an automated content generator that uses OpenAI to generate personalized messages based on user preferences. Includes enhanced collaboration platform and permission system for users and dashboards.
